

medisolv[®]

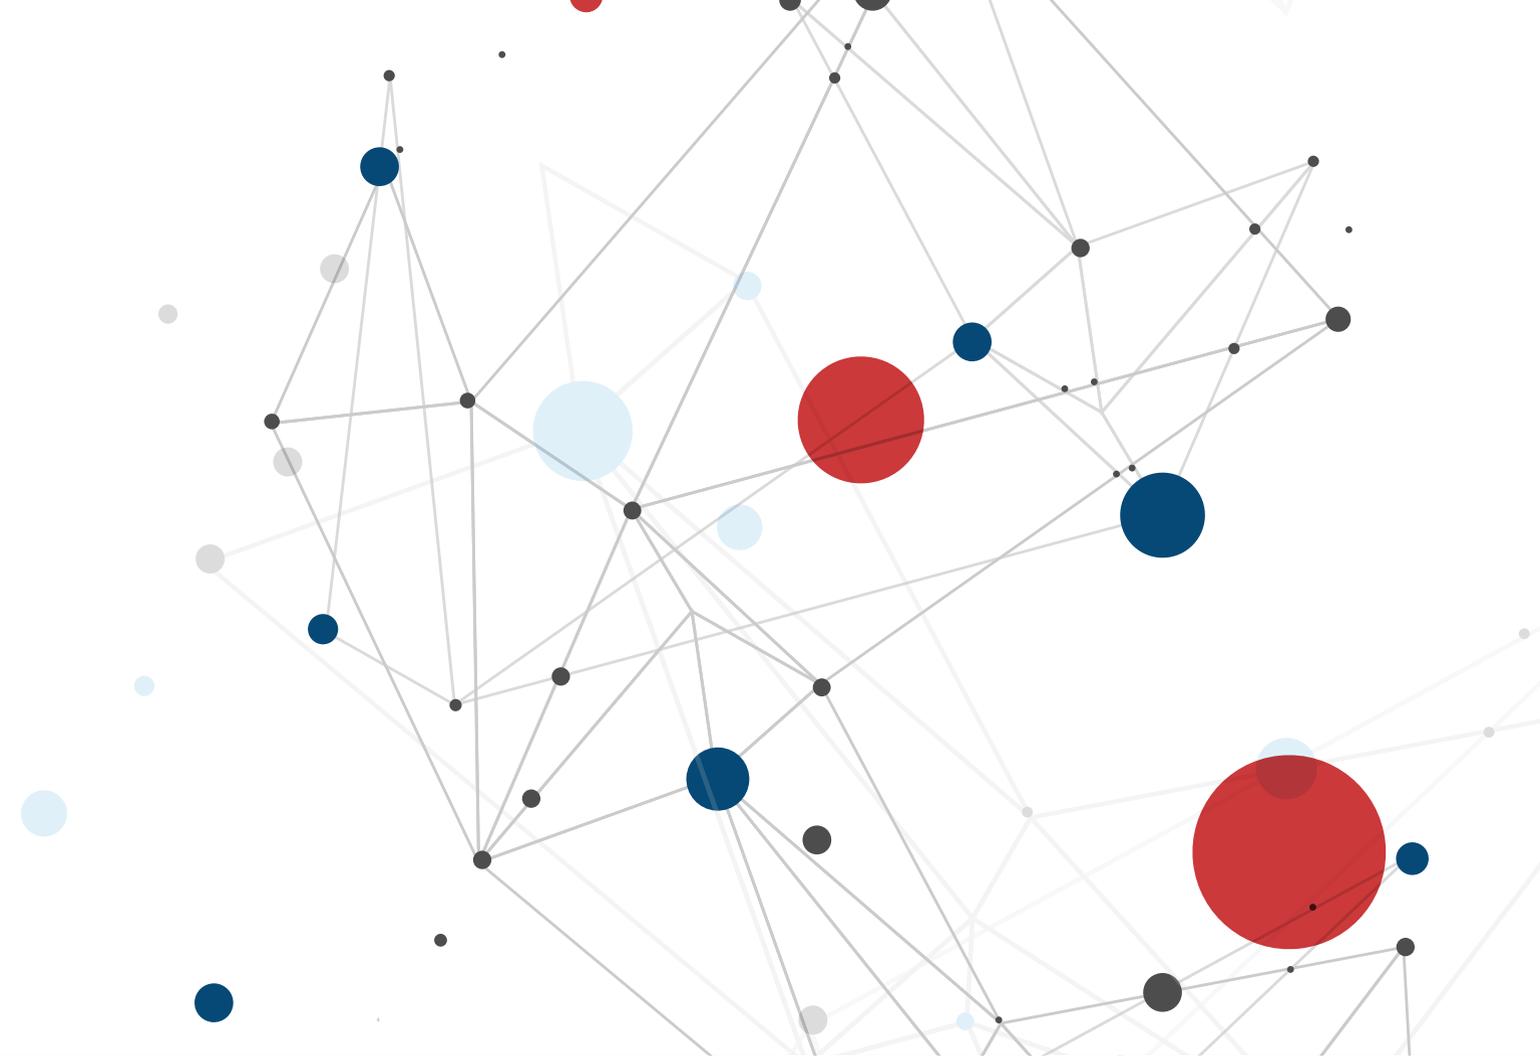

Your Quality Partner

QUALITY

**PATIENT
FOCUSED**

**DATA
DRIVEN**

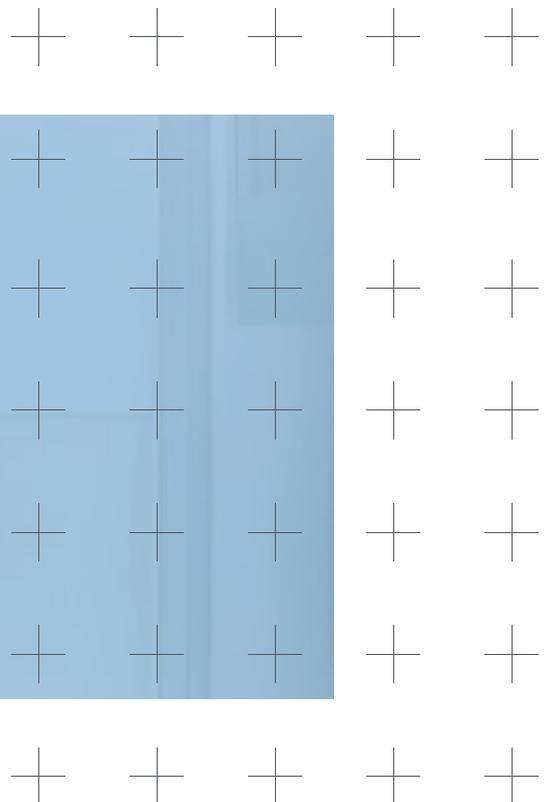

**You believe in better healthcare.
We believe in you.**

You have made it your mission to improve healthcare. At Medisolv, we think that is a mission worth fighting for.

So, we set out to create something different: a company that combines high-performance technology with the irreplaceable strength of human know-how to be the complete quality partner you need.

You'll have more than just powerful software. You'll have a support system that empowers you to unlock your data's higher calling so that you can create real, meaningful change for the patients and communities that are counting on you.

What's Included

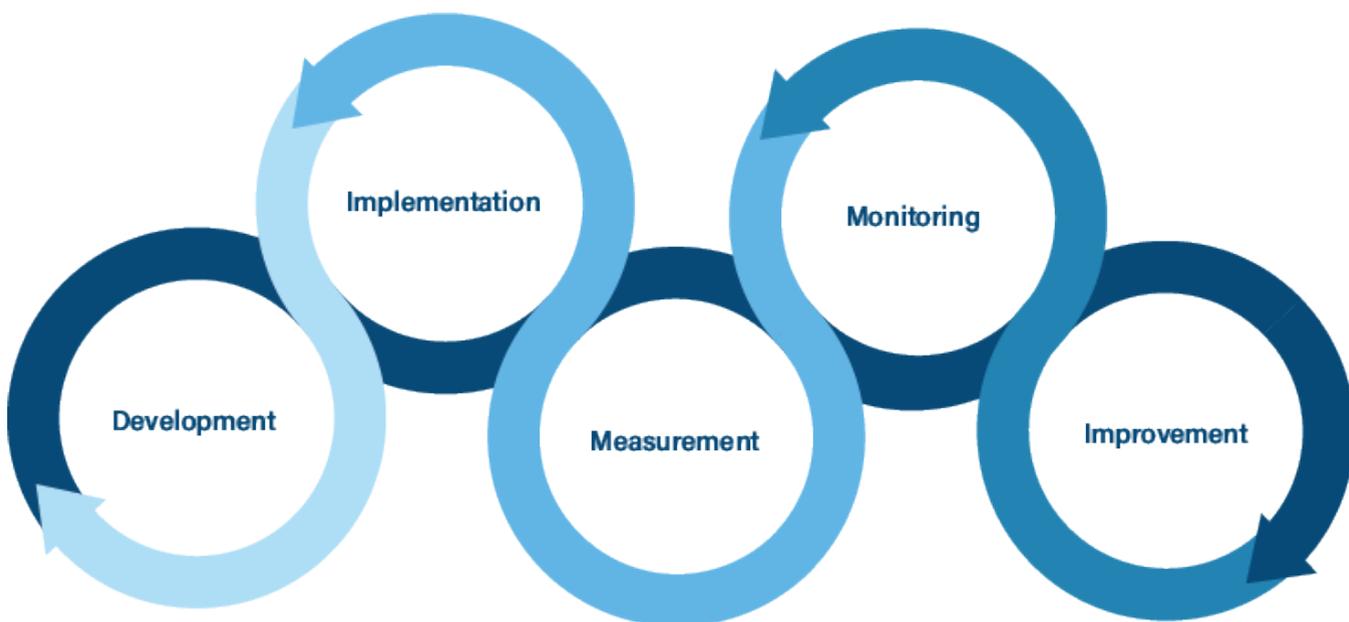

Medisolv Quality365SM IT Services

The data you need to advance patient care every day.

As a quality leader, you want more than a good regulatory submission. You want to deliver measurable quality improvement for your patients, 7 days a week, 365 days a year. Medisolv Quality365SM supplies your organization with IT consulting services to help your healthcare organization make the most use of our software.

Measure Lifecycle Management

Get hands-on guidance for the entire life-cycle of your quality measures, from development, implementation and mapping to continuous improvement. You'll have a partner to help you review your performance, troubleshoot errors, and identify opportunities to improve.

Near Real-Time Information

- With Medisolv Quality365SM, you'll never feel in the dark. Our solutions give you access to the powerful and proactive information you need to make a difference in the moments when it really counts
- Timely access to data
- Prompt updates to new codes and specifications
- Ongoing regulatory guidance and education

What's Included

SubmissionsPlus™ IT Consulting Services

Peace of mind when it's go-time.

Submissions are inherently stressful. But they don't have to keep you up at night when you have SubmissionsPlus™ from Medisolv. It's designed to manage all the moving parts of your submission for you—and keep you informed of your progress—so that you can feel confident every step of the way. With the SubmissionsPlus™ provides you with the IT consulting services your healthcare organization needs to have a successful submission.

How it Works:

10,000+

Quarterly submissions to CMS
and The Joint Commission

Zero

CMS penalties for failure to
successfully report in any year
across all Medisolv clients

**It makes us feel comfortable knowing that, with Medisolv, everything is
correctly submitted and it's done right.**

*Sandy Deplonty | Chief Information Officer
MyMichigan Medical Center Sault*

What's Included

Your Medisolv Clinical Quality Advisor:

A partner who's ready to help you win.

The success of your quality programs doesn't rely simply on having the right software. It's about having the right people in your corner, too. As a Medisolv client, you'll be partnered with a dedicated Clinical Quality Advisor—someone you can lean on for everything from measure mapping to data analysis to “what-exactly-is-CMS-saying?” stress relief.

No Extra Costs

Your Medisolv Clinical Quality Advisor is accessible to you day in and day out, with no time restraints or extra costs. Talk to your Advisor as often as you need them; they're here to help you succeed every day.

Real Healthcare Experience, Guaranteed

Every Medisolv Clinical Quality Advisor has worked, on average, 15 years in clinical settings as nurses, abstractors, analysts, IT directors, and quality managers. You'll have an ally that has walked in your shoes, understands your challenges, and can show you how to conquer them on a real-world level.

95%

Medisolv's Client
Retention Rate

“ My Medisolv Quality Advisor has been a real mentor. She's great at helping me understand where we're going and where we need to be. ”

*Tia Demand | Clinical Informatics Supervisor
Bothwell Regional Health Center*

Build Your Solution

The Medisolv Platform:

One Platform.

**Sky's-the-limit quality
improvement possibilities.**

The Medisolv Platform makes it easy for you to transform disparate data into one, comprehensive, high-performance quality management program. Choose from a variety of modules to build a custom solution that lets you effectively monitor and manage your performance—and make smart, analytics-driven decisions—all in one place.

Explore Our Modules

12

ENCOR for Electronic Hospital Measures

The 3-in-1 tool that gives you the power to conquer your eCQM goals, take on hybrid measures, and benchmark your performance with stunning precision.

16

ENCOR for Hospital Abstracted Measures

Get your charts sooner—and advance patient care faster—with the industry's most user-friendly abstracted measures solution.

18

ENCOR for Electronic Clinician Measures

The quality improvement engine you need to take your traditional MIPS, APP, and MVP reporting to the next level.

20

ENCOR for Registry Measures

Optimize your performance using CQMs—or develop your own measures—with the most flexible CQM and Registry solution.

22

Value Maximizer

The groundbreaking module that combines machine learning and predictive modeling to help you take control of tomorrow's value-based performance and payments.

Custom Development Modules

Our custom development services can help you build your own measures and risk stratification tools. **Contact us to learn more.**

ENCOR for Electronic Hospital Measures

Hospital eCQMs | Hybrid Measures | Benchmarking

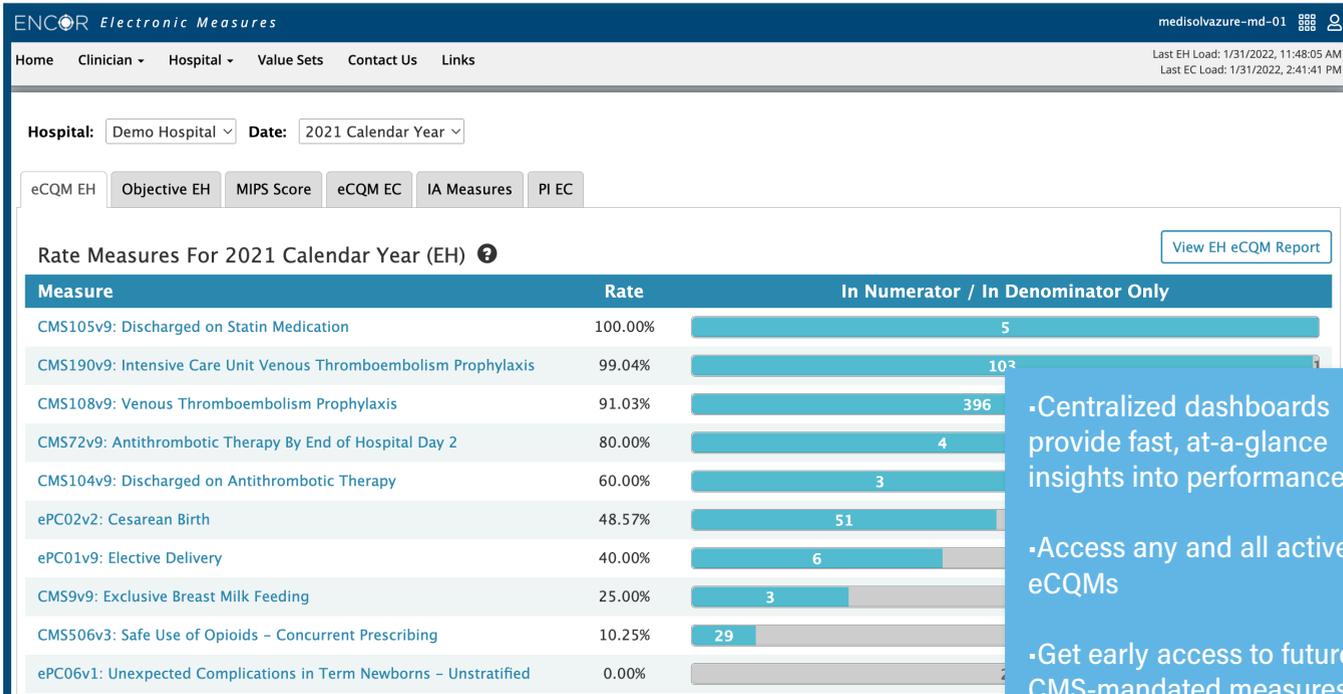

The one solution that turns your eCQM program into a triple threat.

Our industry-leading eCQM management solution gives you three times the power to achieve your performance goals and optimize patient care. Improve your eCQM metrics with rapid precision. Stay at the forefront of CMS' fast-evolving hybrid measures. And get the nationwide benchmarking insights you need to protect and grow your position as a leading healthcare system.

Accelerated eCQM Intelligence

Faster, smarter data so you can create change now.

-  eCQM data is refreshed daily for near real-time insights into your performance
-  Annual eCQM specification updates are automatically made for you
-  Data can be extracted and normalized from multiple EHRs, if necessary
-  Submission services are included even for non-mandatory measures

The screenshot shows the ENCOR Electronic Measures dashboard. At the top, there's a navigation bar with 'Home', 'Clinician', 'Hospital', 'Value Sets', 'Contact Us', and 'Links'. Below that, filters for 'Hospital: Demo Hospital' and 'Date: 2021 Calendar Year' are visible. A row of tabs includes 'eCQM EH', 'Objective EH', 'MIPS Score', 'eCQM EC', 'IA Measures', and 'PI EC'. The main content area is titled 'Rate Measures For 2021 Calendar Year (EH)' and contains a table with the following data:

Measure	Rate	In Numerator / In Denominator Only
CMS105v9: Discharged on Statin Medication	100.00%	5
CMS190v9: Intensive Care Unit Venous Thromboembolism Prophylaxis	99.04%	103
CMS108v9: Venous Thromboembolism Prophylaxis	91.03%	396
CMS72v9: Antithrombotic Therapy By End of Hospital Day 2	80.00%	4
CMS104v9: Discharged on Antithrombotic Therapy	60.00%	3
ePC02v2: Cesarean Birth	48.57%	51
ePC01v9: Elective Delivery	40.00%	6
CMS9v9: Exclusive Breast Milk Feeding	25.00%	3
CMS506v3: Safe Use of Opioids - Concurrent Prescribing	10.25%	29
ePC06v1: Unexpected Complications in Term Newborns - Unstratified	0.00%	2

Overlaid on the right side of the dashboard are three callout boxes:

- Centralized dashboards provide fast, at-a-glance insights into performance
- Access any and all active eCQMs
- Get early access to future CMS-mandated measures

eCQM Visualizer: Qualifying Data Elements

CMS506v3 - Safe Use of Opioids - Concurrent Prescribing

Measure Description: Proportion of inpatient hospitalizations for patients 18 years of age and older prescribed, or continued on, two or more opioids or an opioid and benzodiazepine concurrently at discharge. This is an inverse measure - being in the denominator is the desired result.

Patient Name: Ford, Jeffrey **Medisolv ID:** 61f8a044d68260558073b79c

Patient Result: In Numerator

ENCOR for Electronic Hospital Measures

Hospital eCQMs | Hybrid Measures | Benchmarking

The one solution that turns your eCQM program into a triple threat.

Simplified Hybrid Measure Management

Stay ahead of the CMS curve without breaking a sweat.

- ✓ Access any and all active hybrid measures
- ✓ Annual hybrid measure specification updates are automatically made for you
- ✓ Get early access to future hybrid measures
- ✓ Submission services are included

Easily spot any missing Core Clinical Data Elements (CCDEs)

Drill-down functionality allows you to identify issues at the patient and provider level

The screenshot displays the ENCOR Electronic Measures interface. At the top, there's a navigation bar with 'Home', 'Clinician', 'Hospital', 'Value Sets', 'Contact Us', and 'Links'. The main content area is titled 'eCQM Measure Results' and shows a 'Measure Summary' table with columns for 'CMS Id', 'Measure Name', and 'Initial Population'. Below this is a 'Missing Results' table with columns for 'CCDE', 'Missing', and 'Missing %'. A callout bubble points to the 'Missing %' column, highlighting values like 7.32%, 7.95%, 5.23%, and 4.60%. A 'Patient Details' section is also visible, showing patient information and a table of 'Missing Results' for various clinical data elements like HR, RR, Temp, SBP, O2Sat, HCT, WT, WBC, Na, BICarb, K, Creat, and Glucose. A 'Conditions' table is shown at the bottom, listing 'Case Identifier', 'Codes', 'Decision To Admit Code', and 'Description'.

Timely Benchmarking

Get a clear and comprehensive picture of how you stack up.

- ✓ Measure performance data is updated quarterly (vs. CMS' 2-year time-frame)
- ✓ Data is compiled from all current Medisolv eQIM clients nationwide
- ✓ Build team buy-in with shareable reports, dashboards, and other tools

The screenshot displays the ENCOR Hospital Ranking interface. At the top, the facility is identified as 'County Hospital'. The main heading is 'Hospital Ranking for Period 2021 - Q3 to 2021 - Q3'. The measure being tracked is 'CMS 506: Safe Use of Opioids - Concurrent Prescribing', with a Medisolv Benchmark of 7.47 and a Favorable Trend indicated by a green arrow. A box on the right provides statistical data: Minimum: 100, Quartile1: 20.79, Median: 16.36, Mean: 17.48, Quartile3: 12.46, and Maximum: 0. A callout box points to this data, stating 'Compare your performance against internal goals as well as national benchmarks'. Below the summary, a table titled 'PEER GROUP COMPARISON' lists various hospitals with their respective ranks and performance metrics. A callout box points to the 'COMPARE' buttons in the table, stating 'Define the peer groups you want to benchmark against'. The table includes columns for Hospital, Rank, Historical Comparison, Population, Denominator, In Denominator Only, Numerator, Excluded, Exceptions, and % Rate. The 'County Hospital' row is highlighted, showing a rank of 80 and a % Rate of 17.33. The bottom right corner of the table indicates '1 - 161 of 161 Items'.

Hospital	Rank	Historical Comparison	Population	Denominator	In Denominator Only	Numerator	Excluded	Exceptions	% Rate

Version EncorApp Prod 5.9.0.296

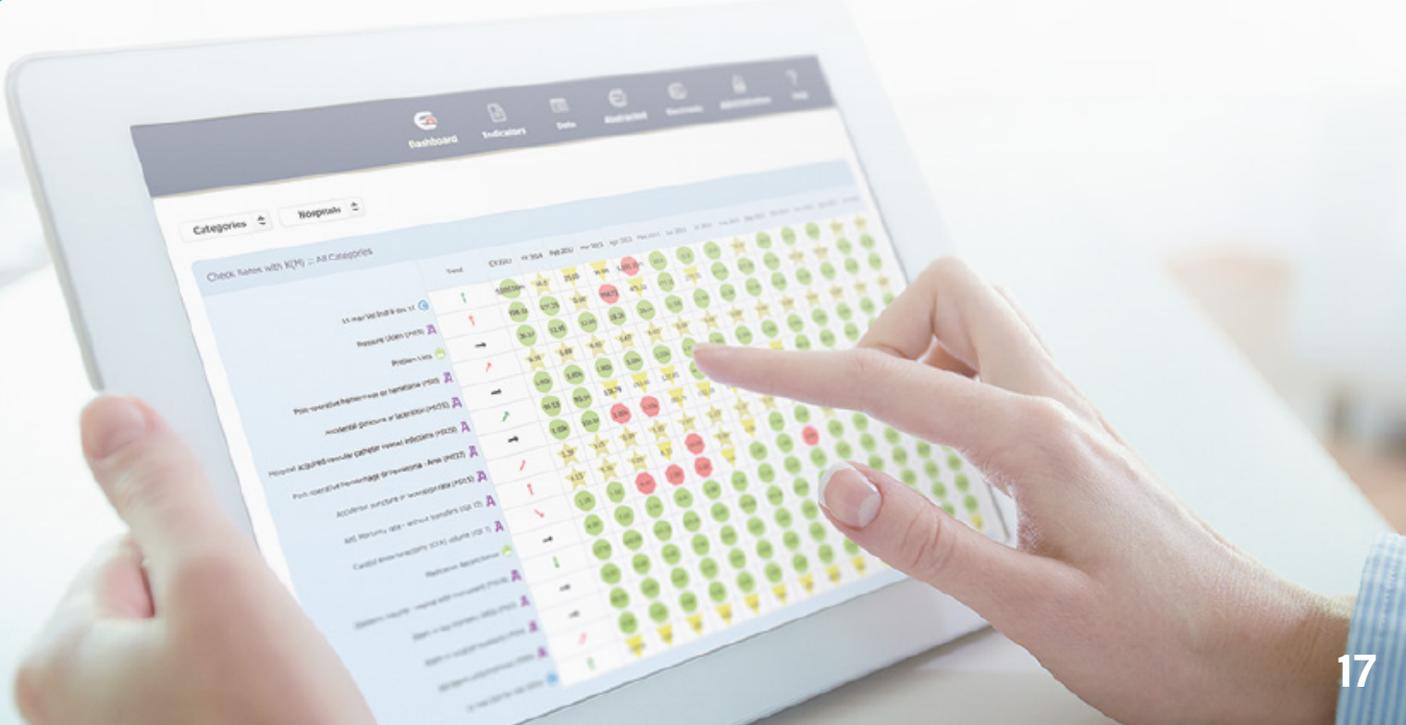

SKIP logic guides you through each case and notifies you when the case has passed or failed the measure

Pre-populated data from your EHR is automatically loaded into each case and updated daily so abstractors don't have to wait to begin abstraction

Powerful Reporting

Get better intel so you can make the right calls.

- ✓ Robust internal reports let you monitor performance by physician, measure, or strata
- ✓ Dashboards centralize your quality measures and give you insight to make better informed decisions
- ✓ Hospital leaders can compare performance against internal goals and national benchmarks

ENCOR for Electronic Clinician Measures

Traditional MIPS | APP | MVP

Don't just simplify your QPP management. Supercharge it.

What do you get when you take our industry-leading eQCM management solution and adapt it to meet the unique demands of your ambulatory practices? A high-performance quality improvement engine that enables you to streamline and optimize your work across every practice and every QPP track, including APP, MVP, and traditional MIPS.

Access all QPP measures, including all Quality eQCMs, Promoting Interoperability and Improvement Activity measures

Juggle less. Improve more.
 With the one tool that streamlines everything for you.

Say goodbye to the chaos and say hello to ENCOR for Registry measures, the module that lets you manage it all, all in one place. Monitor and improve your CQM performance system-wide. Or create your own registry to develop and publish custom measures that matter to your practices. It's the focus, flexibility, and peace of mind you've been waiting for.

▶	📄	52	Chronic Obstructive Pulmonary Disease (COPD): Long-Acting Inhaled Bronchodilator Therapy	503	251	252	246	0	6
▶	📄	118	Coronary Artery Disease (CAD): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy - Diabetes or Left Ventricular Systolic Dysfunction (LVEF < 40%)	366	183	183	183	0	0

Named a Qualified Clinical Data Registry (QCDR) by CMS

By earning this elite designation—which allows us to collect and submit both eCQMs and CQM data and provide measure benchmarking to Registry participants for approved measures—we can give your practice a more advanced level of support.

Time-Saving Automation:

Instant data gives you a head start every day.

- ✓ Pre-populated data from your EHR is automatically loaded into each case and updated daily so abstractors don't have to wait to begin abstraction
- ✓ Cases are sorted by status, so you can quickly see which cases are complete or incomplete
- ✓ Skip logic guides you through each case and notifies you when the case has passed or failed the measure

The Medisolv dashboard is so user-friendly. You can drill down to each clinic, or provider, or even each patient and see where they met the measure or didn't.

Value Maximizer

Value-Based Performance Forecasting

Forecast your performance and payments up to 3 years in advance.

Lead your organization to long-term success with the groundbreaking tool that combines machine learning and predictive modeling to forecast your performance and payments in real-world terms. Built for healthcare leaders—not computer scientists—the tool quickly distills complex findings into easy-to-understand reports and is 100% web-based for maximum ease. No EHR integration required.

Comprehensive Visibility

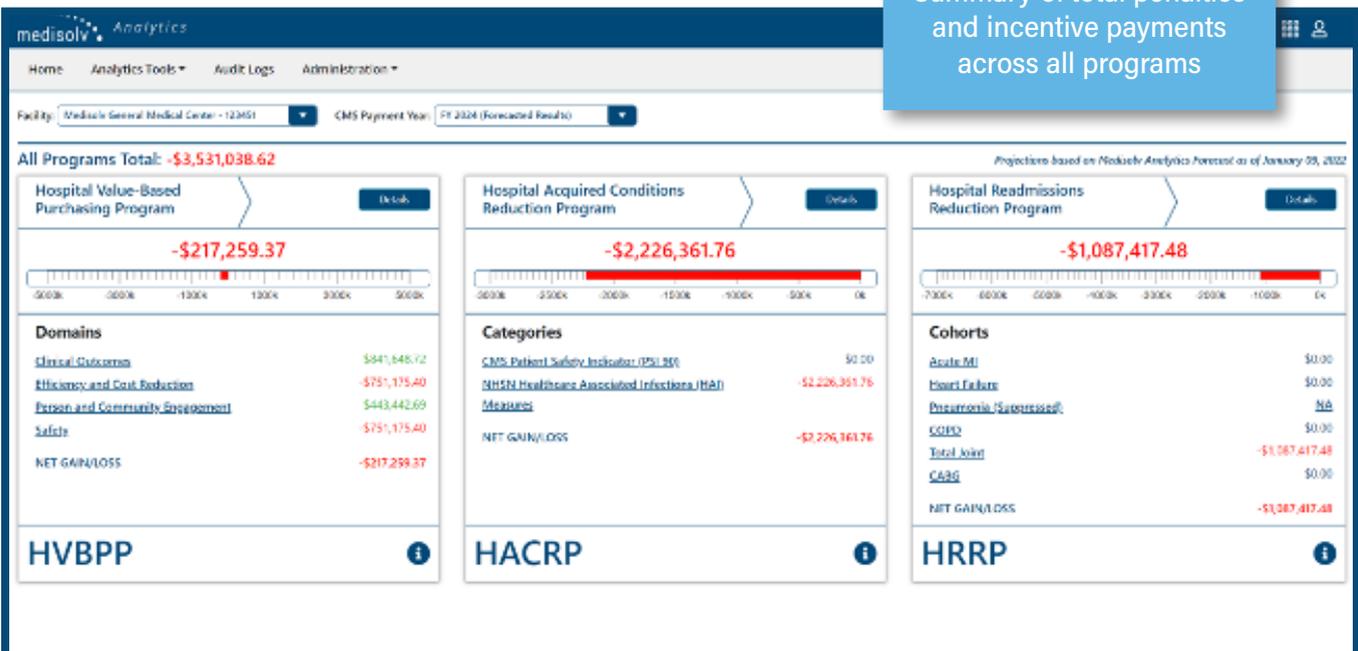

The only tool you need to take control of tomorrow.

- Forecast your performance and payments up to 3 years in advance
- Flag and correct penalties before they happen
- Manage all 3 CMS hospital value-based care programs (HVBPP, HAC, and HRRP) in one place
- Advanced algorithms continually auto-update so you never have to worry about data accuracy

Diversified Reports

View the forecasting intel that matters to you.

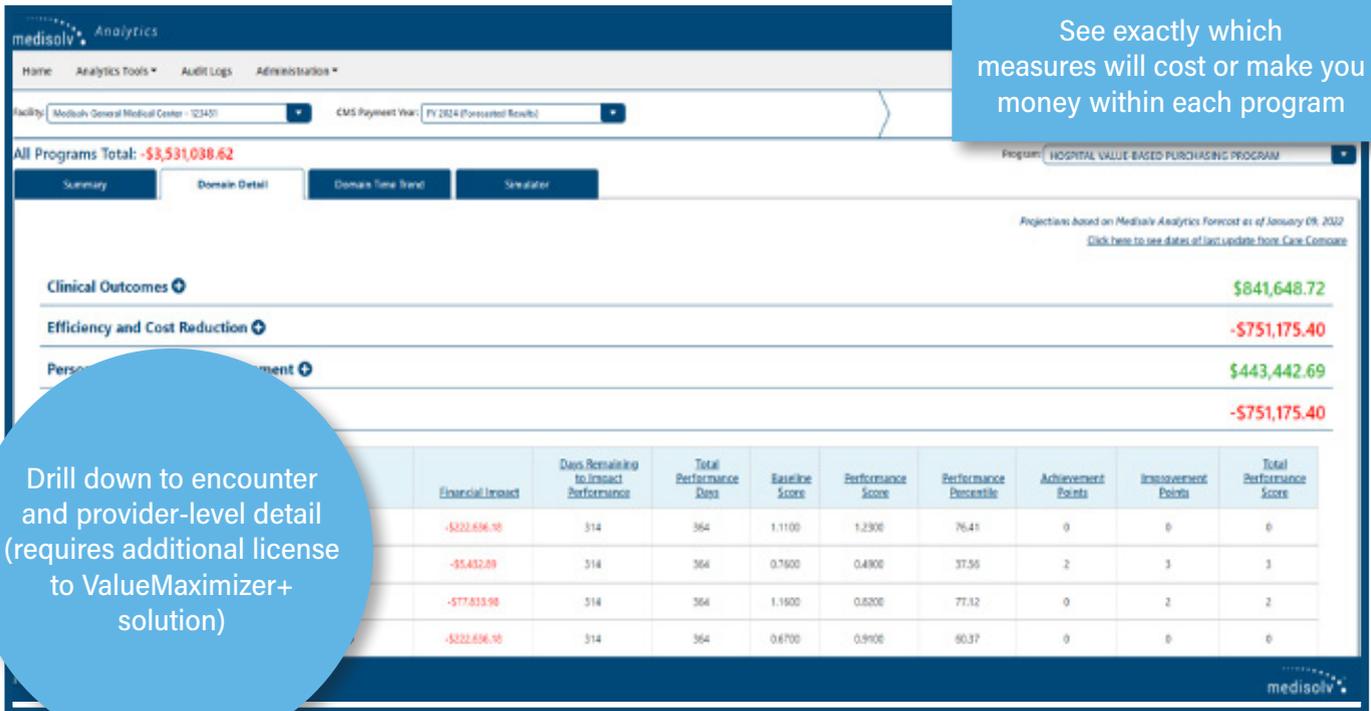

Summary of total penalties and incentive payments across all programs

Drill-Down Precision

Identify clear ways to maximize your reimbursements.

See exactly which measures will cost or make you money within each program

Drill down to encounter and provider-level detail (requires additional license to ValueMaximizer+ solution)

Time trend analysis that covers 3 historical and future CMS fiscal years

Use the simulator tool to quickly understand the impact that changes will have on your measure performance and payment reimbursement

About Medisolv

Every Medisolv Solution Includes:

Unlimited Support

Submission Services

Your Dedicated Medisolv Clinical Quality Advisor

Plus! Effortless Data Extraction

With Medisolv, you don't have to pay another vendor to extract your data. Our platform makes EHR data extraction and aggregation easy, so that you can get a jump start on your quality improvement initiatives.

A Platform Built for Every Program:

Hospitals

- Inpatient Quality Reporting (IQR)
- The Joint Commission ORYX® initiative
- Promoting Interoperability
- Outpatient Quality Reporting (OQR)
- Inpatient Psychiatric Facility Quality Reporting (IPRQR)
- Hospital Acquired Condition Reduction (HACRP)
- Hospital Readmission Reduction (HRRP)
- Hospital Value-Based Purchasing (HVPB)

Clinicians

- Quality Payment Program
- MIPS
- MIPS Value Pathways (MVP)
- Alternative Payment Models (APM)
- APM Performance Pathway (APP)
- CPC+
- MSSP Shared Savings

About Medisolv

The company built for people who are passionate about quality.

Medisolv was created in 1999 under the belief that, when you combine the latest technologies with human ingenuity, better healthcare is possible for everyone. A pioneer in the quality reporting space, we have successfully reported electronic data to CMS and The Joint Commission on behalf of our clients since 2012.
